## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to compounds of the formula of claim 1, classified in class 564, subclass: various.
- II. Claims 6-16, drawn to methods of modulation or regulation of gene expression, classified in class 435, subclass: various.
- III. Claim 17, drawn to a method of producing polypeptides using cells, classified in class 435, subclass: various.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, a compound, a method of modulating or regulating gene expression, and an method of polypeptide synthesis necessarily have different designs and modes of operations, since one is a set of compositions of matter (compounds), one is a method for synthesizing compositions of matter structurally unrelated to those above (a polypeptide) and the other is a method pertaining to gene expression.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1621

Additionally, claims 1-5 are generic to the following disclosed patentably distinct species: the species defined by the formula of claim 1. The species are independent or distinct because the instant Markush group teaches sets of structurally and patentably distinct compounds, for instance, when Y=phenyl and when Y=2-pyridyl. If applicant elects Group I, then applicant is also required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. The examiner respectfully requests that the elected species be explicitly defined in terms of the variables of the formula of claim 1.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
